RESEARCH TOPICS

My research and expertise mainly focus on Operations Research in Smart Grid and Transportation, including:

- Two-stage stochastic/robust optimization with decision-dependent uncertainty.
- Distributionally robust optimization framework for power system operations and planning.
- Fleet electrification on optimizing the integration of transportation and power systems.
- Advanced decomposition algorithms for solving two-stage stochastic mixed-integer programs.
- Quantum algorithms and their applications to optimization in power networks.

SUMMARY OF QUALIFICATIONS

- Programming experience with Python, Matlab, R, Julia, and C proven in coursework and research.
- Strong understanding of decision making and optimization mathematics such as mixed-integer programming and data-driven optimization.
- Advanced knowledge of LaTeX, Microsoft Office Suite.
- Excellent oral and written communication skills.

EDUCATION BACKGROUND

University of Washington

Seattle, US

Ph.D. in Industrial Engineering, [Department of Industrial & Systems Engineering](#)

Sept. 2021-Present

Completed Courses: Machine Learning; Stochastic Processes; Integer Programming; Statistical Quality Engineering

GPA: 3.96/4.00; Advised by: [Prof. Chaoyue Zhao](#)

Tsinghua University

Shenzhen, China

M.S. in Electrical Engineering, [Tsinghua-Berkeley Shenzhen Institute](#)

Sept. 2018-Jun. 2021

Thesis: *Active Distribution System Planning Considering Energy Storage Systems Participating in Multiple Ancillary Services*

GPA: 3.98/4.00 (Rank 1/128); Co-advised by: [Prof. Hongbin Sun](#) and [Prof. Xinwei Shen](#)

Wuhan University

Wuhan, China

B.Eng. in Electrical Engineering, Department of Electrical Engineering and Automation

Sept. 2014-Jun. 2018

GPA: 3.87/4.00 (Rank 4/340)

RELEVANT EXPERIENCE

National Renewable Energy Laboratory (NREL)

Golden, Colorado

Hydrogen Systems for Performance-based Value Stacking

Jun. 2022-Sept. 2022

◇ Simulated the daily hydrogen load based on the data of a hydrogen fueling station

- Modeled the fueling process of the hydrogen-fueled trucks based on the queueing theory, which can be separated into two events: their arrivals and departures from the hydrogen station.

◇ Developed a planning model for the integrated hydrogen energy system

- Implemented the stochastic planning model with Python and solved with Google OR-Tools. The long-term profitability of the integrated system under both current and future conditions was compared in the planning results.

Smart Grid and Renewable Energy Laboratory

Shenzhen, China

Distribution System Planning Considering Regulation Services and ESS Degradation

Sept. 2018-Jun. 2021

◇ Considered degradation model of storage units in distribution system planning

- Added a linear degradation penalty term in the objective to avoid excessive charge/discharge of ESSs;
- Compared degradation curves of ESSs in different cases, and identified that the storage lifetime was prolonged for one year when considering degradation penalty.

◇ **Developed Gaussian mixture model to generate stochastic scenarios**

- Adopted GMM to model distributions of load demand, LMP, regulation signals and prices accurately to generate diverse stochastic scenarios.

◇ **Modified progressive hedging algorithm**

- Proved that a rational average solution is superior to the traditional mathematical expectation on stable convergence when implementing *non-anticipativity* constraints;
- Found that with parallel computing and gap-dependent penalty factors, the modified progressive hedging outperformed Gurobi and the L-shaped method.

- TA, [Energy-Environment and Data-Information 100 level](#) (16 hrs), **Prof. Xuan Zhang** Fall, 2019

AWARDS

Graduate Career:

- Clean Energy Institute Graduate Fellowship Jul. 2023
- Honorable Mention by the Renewable Energy Scholarship Foundation Apr. 2023
- UW College of Engineering Dean's Fellowship Sept. 2021
- Tsinghua Comprehensive Scholarship Sept. 2019

Undergraduate Career:

- First Prize in the 10th National University Students Electrical Math Modeling Competition Aug. 2017
- First Power Exploration Scholarship of Wuhan University (3/340) Sept. 2016
- China National Scholarship (Top 0.2% of all undergraduate students in China) Nov. 2015
- First-class Student Scholarship & Merit Student Scholarship of Wuhan University Nov. 2015
- Merit Freshmen Scholarship of Wuhan University (Top 5% of students enrolled at WHU) Dec. 2014

(Updated on December 28, 2023.)
